Executive Summary

The global economy remains relatively resilient, following several years of negative global shocks from geopolitical tensions, high interest rates, and weak global trade & investment. According to the World Economic Outlook (WEO) report of the IMF (April 2024), the global economy has shown a growth of 3.2 percent in 2023 and is projected to remain at 3.2 percent in 2024, despite flaring geopolitical tensions and high interest rates.

In advanced economies, growth is projected to rise from 1.6 percent in 2023 to 1.7 percent in 2024 as a result of softening in monetary policy. In emerging markets and developing economies (EMDEs), growth is expected to be stable at 4.2 percent in 2024. Low-income developing countries are expected to experience gradually increasing growth, from 4.0 percent in 2023 to 4.7 percent in 2024. Africa's GDP growth is expected to surpass the global average in 2024. According to the African Economic Outlook 2024, Africa's real GDP growth is projected to rise to 3.7 percent in 2024.

The domestic economy is expected to experience robust growth in 2024, as agriculture production continues to recover, and investment is expected to increase following Somalia's achievement of the Heavily Indebted Poor Countries (HIPC) completion point in December 2023. The real GDP growth is expected to moderate in 2024 with a growth of 3.7 percent in 2024 and is projected to remain at 3.7 percent in 2025.

As domestic economy is projected to experience moderate growth, the Macroeconomic performance is expected to remain stable in 2024. The headline inflation rate remains single-digit and is projected to increase to 4.8 percent in 2024.

The total value of country's imports during the first quarter of 2024 recorded US\$2,260.62 million, while the total value of exports in the reporting period amounted to US\$340.96 million, resulting in a trade deficit of US\$1919.66 million. Livestock exports remain the top export category in this quarter, totalling US\$233.93 million, and representing 69 percent of total exports.

In the first three months of the fiscal year of 2024, the FGS fiscal receipts reached US\$118.4 million, which is equivalent to 11.4 percent of the target budget and the total government expenditure reached US\$126.4 million, which represented 12 percent of the planned budget.

In the first quarter of 2024, total assets surged to US\$1,813.7 million marking a notable 22 percent increase compared to the same period last year and a 1 percent increase compared to the last quarter of 2023 and total liabilities surged to US\$1,520 million, marking a 20 percent increase compared to the same period last year.

In the first quarter of 2024, total inward remittances to Somalia reached US\$1,500 million. This marks an increase of 4 percent compared to both 2023Q1 and 2023Q4. In the first quarter of 2024, Somalia's National Payment System (NPS) recorded 297,036 transactions totalling US\$393 million.

Soo Koobid Guud

Dhaqaalaha Adduunka

Koboca dhaqaalaha adduunka ayaa u muuqda mid xasiloon, ka dib dhowr sano oo xalad dhaqaale taban oo ka timid xiisadaha siyaasadeed ee dunida, hubanti la'aan kajirtay suuqyada maaliyadeed iyo sidoo kale sicirbararka ka jiray wadamada intooda badan. Koboca dhaqaalaha adduunka ayaa la filayaa inuu kordho boqolkiiba 3.2 sanadkaan 2024-ka, waxaa kaloo la saadaalinayaa inuu koboca dhaqaalaha adduunka uunan sameyn doonin wax is badal ah sanadka 2025 ka. Koboca wax-soo-saarka adduunka ayaa la filayaa inuu ka yara kordho saadaashii hore, sababta oo ah koboca joogtada ah ee ganacsiga iyo maalgashiga.

Dhaqaalaha Gudaha

Dhaqaalaha gudaha ayaa la filayaa in uu muujiyo koboc xooggan sanadka 2024-ka, iyada oo kabashada waxsoosaarka beerahuna ay sii socoto, sido kale waxaa la filayaa in maalgashiga uu kordho ka dib markii Soomaaliya ay gaartey heerki ugu dambeeye ee deyn cafinta. Koboca waxsoosaarka gudaha waxaa lasaadaaliyay inuu gaari doono 3.7 boqolkiiba sanadka 2024-ka, sidoo kale waxaa kaloo la saadaalinayaa inuu koboca dhaqaalaha wadanka uunan sameyn doonin wax is badal ah, sanadka 2025 ka. Sicir-bararka waxa uu gaaray 5.9 boqolkiiba rubuca koowaad ee 2024-ka. Dhoofinta xoolaha ayaa gaartay qiima lacageed oo dhan 233.9 milyan oo Dollarka Mareeykanka ah taas oo kadhigan 69 boqolkiiba guud ahaan wax-sooraarka dalka.

Wadarta qiimaha alaabaha waddanku dibadda u dhoof-geeyay rubuca koowaad ee sanadkan 2024 ka ayaa gaartay qiima lacageed oo dhan 340.96 milyan oo Doollarka Mareeykanka ah, halka uu ka ahaa 265.07 milyan oo Doollarka Mareeykanka, xilligaanoo kale sanadkii hore. Dhinaca kale, qiimaha wax-yaabaha waddanku dibadda kasoo dhoofsaday rubuca koowaad ee 2024 ka ayaa muujiyay kor u kac boqolkiiba 38 ah, gaarayna qiima lacageed oo dhan 2,260.62 milyan oo Doollarka Maraykanka ah marka la barbar dhigo 1,643.70 milyan oo Doollarka Maraykanka ah isla xilligaan sanadkii hore.

Miisaaniyadda Dowladda

Dhakhliga dowladda Soomaaliya soo xareysay rubucii koowaad ee sanadka 2024 ka waxaa uu gaaray 118.4 milyan oo Doollarka Maraykanka ah. Dhakhliga gudaha ka soo xarooda ayaa isna gaarayay rubucii koowaad ee sanadkan 91.7 milyan oo Doollarka Maraykanka ah, halka deeqaha dowladda Soomaaliya lagu caawiyay ay gaareen 26.7 milyan oo Doollarka Maraykanka ah. Rubucii koowaad ee sanadkan 2024-ka kharashaadka dowladda Soomaaliya waxa ay gaarayeen 126.4 milyan oo Doollarka Maraykanka ah, kharashaadka rubucii koowaad ee sanadkan 99 boqolkiiba waxa ay ku baxeen kharashaadka soo noqnoqda. Halka 1 boqolkiiba kharashaadka loo isticmaalay arimaha horumarinta.

Hay'adaha Maaliyadda

Rubuca koowaad ee sanadka 2024-ka hantida bankiyada ganacsiga ee gaarka loo leeyahay ayaa gaartay 1,813.7 milyan oo dollarka Mareykanka ah, tasoo muujinaysa koror boqolkiiba 22 ah marka loo barbardhigo isla xiligaan sanadkii hore. Deymaha bankiyada lagu leeyahay ayaa iyaguna gaareen 1,520.1 milyan oo Dollarka Mareykanka ah taasoo iyaduna muujinaysa koror boqolkiiba 20 ah marka loo barbardhigo isla xiligaan sanadkii hore. Xawaaladaha Soomaaliya ee lafdhabarta u ah ganacsiga iyo koboca dhaqaalaha ee dalka ayaa wadarta lacagta waddanka ay soo galiyeen ay kor u kacday boqolkiiba 4 gaartayna qiima lacageed oo dhan 1,500.0 milyan oo Dollarka Mareykanka ah. Lacagaha layskugu xawilay nidaamka lacag bixinta midaysan ee bankiga dhexe ayaa gaaray 393 Milyan oo Doolarka Maraykanka ah halka ay ka ahaayeen 353.5 Milyan oo Doolarka Maraykanka ah taasoo ka dhigan koror boqlkiiba 11 ah.

World Economy

The global economy remains relatively resilient, following several years of negative global shocks from geopolitical tensions, high interest rates, and weak global trade & investment. According to the World Economic Outlook (WEO) report of the IMF (April 2024), the global economy has shown a growth of 3.2 percent in 2023 and is projected to remain at 3.2 percent in 2024, despite flaring geopolitical tensions and high interest rates. In 2024, Global GDP growth is expected to increase slightly than the previous projection due to mainly continued steady growth in trade and investment.

In advanced economies, growth is projected to rise from 1.6 percent in 2023 to 1.7 percent in 2024 as a result of softening in monetary policy. In emerging markets and developing economies (EMDEs), growth is expected to be stable at 4.2 percent in 2024 and 2025. Low-income developing countries are expected to experience gradually increasing growth, from 4.0 percent in 2023 to 4.7 percent in 2024. Africa’s GDP growth is expected to surpass the global average in 2024. According to the African Economic Outlook 2024, Africa’s real GDP growth is projected to rise to 3.7 percent in 2024. After experiencing two years of sluggish growth, Sub-Saharan Africa is anticipated to see a moderate increase, with growth rates climbing from 3.4 percent in 2023 to 3.8 percent in 2024, this improvement is largely attributed to a resurgence among oil-exporting nations.

According to the Organisation for Economic Co-operation and Development “OECD” quarterly report in the first quarter of 2024. The OECD area has seen a quarter-on-quarter growth of 0.4 percent. In the G20, quarter-on-quarter growth of the GDP surged by 0.9 percent in the first quarter of 2024. The GDP growth rate increased by 0.3 percent in both the Euro Area and the European Union in the first quarter of 2024. In the G7, quarter-on-quarter GDP growth slowed to 0.3 percent in the 2024Q1 compared to 0.4 percent in the 2023Q4.

1.1 Global Trade

Global trade growth is rebounding in 2024, driven by an increase in goods trade. According to the Global Economic Prospects report of the World Bank (June 2024), global trade growth is projected to grow by 2.5 percent at the end of 2024, although remains below the average rates of the two decades, outside of the global pandemic. After declining in 2023, the G20 trade in goods exports rebounded in 2024Q1,

with a rise of approximately 1.9 percent, signalling the stabilization of the supply chains. Despite the positive trends in exports, it is noteworthy that imports also experienced a decline of 0.2 percent in the same period. G20 services trade continued to expand in 2024Q1, exports and imports grew around 2.2 percent and 3.5 percent, respectively.

Figure 2: Quarterly G20 International Trade (Percentage Change), Seasonally Adjusted Data 2023Q1-2024Q1

Source: OECD International Trade Statistics Quarterly Report 2024Q1

1.2 Global Inflation

Global inflation has continued to decline in both advanced economies and emerging markets & developing economies. As noted in the IMF World Economic Outlook report of April 2024, global headline inflation is expected to fall from 6.8 percent

in 2023 to 5.9 percent in 2024, with a return to inflation targets anticipated sooner than previously expected. The disinflation reflects drops in food and energy prices, along with the decline in the core inflation rate.

Figure 3: Global Inflation Rate (Percentage Change) 2023-2025

Source: IMF WEO April, 2024

Advanced economies (AEs) are projected to have faster disinflation, falling by 2 percent point from an estimated 4.6 percent in 2023 to 2.6 percent in 2024. In emerging markets and developing economies (EMDE), inflation is projected to remain unchanged at 8.3 percent in both 2023 and 2024. The global FAO food price remained steady, at 118.3 points in March 2024 from 118.5 points in December 2023 as noted in the FAO food price index monthly report of April 2024.

1.3 Global Financial Stability

Global financial conditions have eased since October 2023 owing to a faster-than-expected reduction in interest rates, lower volatility, and stronger equity markets, despite the major central banks have maintained tighter monetary policies. Reductions in policy rates in advanced economies have led to an increased appetite for assets in emerging markets and developing economies. This shift in investment preferences has resulted in a reduction of sovereign spreads on risk-free government debt, which have fallen from their peaks in July 2022 toward levels seen before the pandemic.

Figure 4: Financial Conditions Indices (Number of standard deviations over a long-term average) 2020Q1-2024Q1

Source: IMF, 2024

1.4 Implications for the Domestic Economy

The global economic conditions significantly affect Somalia’s domestic economy, which relies heavily on imports for goods. The ongoing decline in global inflation led to lower import pass-through inflation, resulting in slowed domestic inflation in the first quarter of 2024. The United Arab Emirates (UAE), Oman, Saudi Arabia, China, India and Türkiye are the largest trading partners. The United Arab Emirates (UAE), Oman and Saudi Arabia are top export partners for Somalia. The UAE’s growth rate is projected to remain unchanged at 3.5 percent in 2024, while Oman is expected to fall to 1.2 percent in 2024, and

Saudi Arabia’s growth rate is projected to grow by 2.6 percent in 2024. In terms of imports, China, India and Türkiye remained the largest import partners. The China’s growth rate is projected to grow by 4.6 percent in 2024. Growth in India is projected to decline to 6.8 percent in 2024. Growth expected to slow for the second consecutive year in Türkiye, with a growth rate of 3.1 percent in 2024. Despite the slower growth in the Somalia’s trade partners, the Somalia’s economy is projected to moderate with a growth of 3.7 percent in 2024.

2

Domestic Economy

The domestic economy is expected to experience robust growth in 2024, as agriculture production continues to recover, and investment is expected to increase following Somalia's achievement of the Heavily Indebted Poor Countries (HIPC) completion point in December 2023. The real GDP growth is expected to moderate in 2024 with a growth of 3.7 percent in 2024 and is projected to remain at 3.7 percent in 2025.

As domestic economic is projected to experience moderate growth, the Macroeconomic performance is expected to remain stable in 2024. The headline inflation rate remains single-digit and is projected to increase to 4.8 percent in 2024. The deficit in the current account is projected to narrow to 9.6 percent of GDP in 2024 from 8.7 percent in 2023, as exports continue to increase. The fiscal performance is expected to show a financing gap of US\$38 million (Approved Budget). However, it is anticipated that by 2024, domestic revenues to increase to US\$346.2 million, an amount that is expected to nearly cover the compensation costs of employees.

During the Deyr season of 2023 (October to December), crop production increased significantly due to favorable rainfall, this contributed to increase agricultural production. Cereal production in the southern regions for the Deyr season is estimated at 82,000 tons, including an off-season harvest of 21,600 tons expected in late February/early March 2024. This figure is 32 percent higher than the 2022 production and the highest since the 2018 Deyr

season, reflecting the positive impact of the mostly favourable rainfall during the rainy season as noted in the Integrated Food Security Phase Classification (IPC) analysis report (February 2024).

The Federal Republic of Somalia was admitted into the East African Community (EAC) bloc by the Summit of EAC Heads of State on 24th November 2023 to become the 8th partner state of the EAC, and a full member on 4th March 2024. This new membership provides to Somalia the opportunity to enhance the country's regional integration and attract regional investments into Somalia, particularly in sectors like agriculture, fisheries and infrastructure as well as access to a larger regional market, facilitating easier trade with EAC member countries.

2.1 Livestock Exports

Livestock sectors are pivotal in Somalia's economy and food security. Livestock exports continue to increase, reflecting a strong demand in foreign markets along with diversification of livestock exports markets beyond Saudi Arabia and outside of the Hajj period. Livestock exports increased by 3 percent compared to the same period last year (2023Q1). In monetary terms, livestock exports contributed US\$233.9 million to the economy, representing 62 percent of the total exports in 2024Q1. In terms of volumes, during the first quarter of 2024, Somalia exported 1,397,785 heads of livestock: comprising 1,245,500 Sheep and Goats, 86,056 Cattles and 66,229 Camels.

Figure 5: Total Value of Livestock Export 2021Q1- 2024Q1

Source: MoF, FSNAU and CBS valuations and adjustments, 2024

2.2 Domestic Inflation

The headline inflation rate declined in the first quarter of 2024, driven by easing food prices. This decline was supported by lower international food prices along with the Favourable rainfall, which boosted crop production, leading to a reduced inflation rate. Overall, the inflation rate slowed to an average of

5.9 percent compared to the same period of the previous (2023Q1) and quarter-on-quarter (-0.5) percent compared to 2023Q4. On monthly inflation trend, the inflation rate fluctuated during the first quarter of 2024 at -0.90 percent, -0.10 percent, and 2.25 percent, in January, February, and March 2024, respectively.

Figure 6: Recent Trends in Domestic Inflation (Percent change) 2022Q1 - 2024Q1

Source: SNBS and CBS calculation, 2024

As the first quarter of 2024, water, housing, electricity & gas, and food & non-alcoholic beverages are the most significant expenditure categories in consumer baskets. These items have the greatest weighted influence on the All-group CPI due to their importance in daily consumption. Food inflation recorded a

decline of (-1.38) percent in the first quarter of 2024, compared to the same period last year, reflecting easing food prices, supported by easing international food prices, while the Water, Housing, Electricity & Gas prices increased to an average of 11.29 percent compared to the corresponding period last year.

2.3 Exchange Rate Developments

The Somalia shilling (SOS) has broadly maintained relative stability with a depreciation bias against the US dollar in the first quarter of 2024. During the first quarter of 2024, Somalia’s shilling depreciated by 0.4 percent with the average rate of SOS28,035 per US dollar in 2024Q1 from a 3.2 percent depreciation in 2023Q4. The shilling fluctuated against the US dollar, reaching SOS28,038, SOS28,034, and SOS28,032 in January, February, and March, respectively.

Trade Analysis

3.1 Trade Analysis 2024Q1

In the first quarter of 2024, the total value of country's exports amounted to US\$340.96 million showing a 29 percent increase compared to the US\$265.07 million exported in 2023Q1. This growth can be attributed to the favourable rainfall experienced over the last two seasons. The improved weather conditions have had a positive impact on agricultural output, leading to increased exports and improved livelihoods.

The total value of country's imports during the first quarter of 2024 recorded US\$2,260.62 million, while the total value of exports in the reporting period amounted to US\$340.96 million, resulting in a trade deficit of US\$1,919.66 million.

Figure 9: Trade Developments 2021Q1-2024Q1

Source: MoF with CBS valuations and adjustments, 2024

3.2 Analysis of Imports in the First Quarter of 2024

The total value of imports for the first quarter of 2024 stood at US\$2,260.62 million. This figure reflects a 38 percent growth compared to US\$1,643.70 million in the same quarter of the previous year (2023Q1), as well as a 31 percent increase from US\$1,725.27 million in the last quarter of 2023.

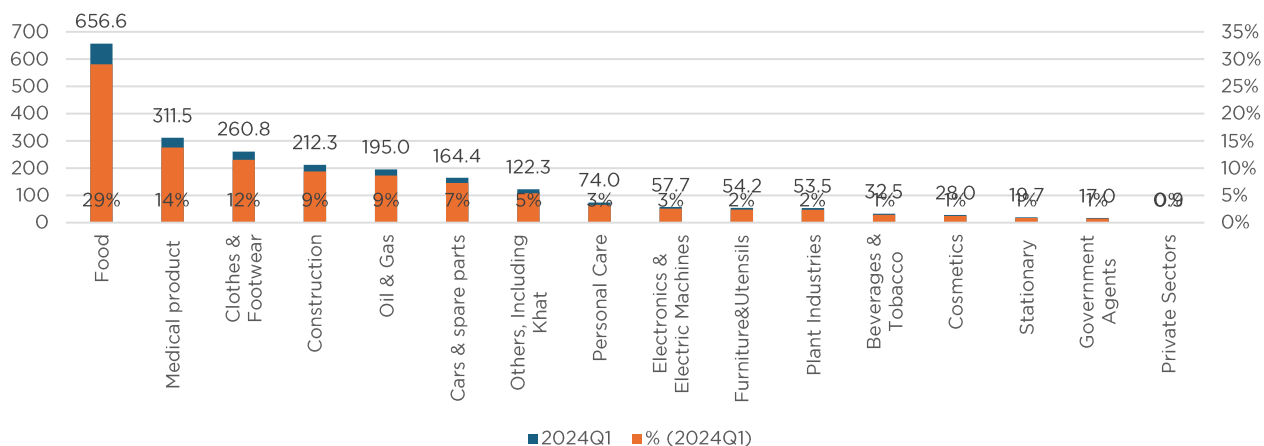

Amidst the diverse categories of goods being imported into the country, certain categories stand out as particularly significant. The importation of food products remains a top priority (29 percent) of total imports in 2024Q1. Additionally, imports of medical products (14 percent), Clothes & Footwear (12 percent), Construction materials and Oil & Gas each constitute 9 percent, as well as Cars & spare parts (7 percent) and the category of others, Including Khat constitute 5 percent of total imports. These are the essential goods for driving the imports growth and are top demanded products in the country.

Table 4: Percentage Share of Imported Categories in the First Quarter of 2024

Category	2023Q1	2023Q2	2023Q3	2023Q4	2024Q1	%(2024Q1)

Figure 10: Percentage Shares of Imported Goods (2024Q1)

Source: MoF with CBS valuations and adjustments, 2024

In this quarter (2024Q1), food imports showed a growth of 39 percent; to US\$656.57 million, compared to US\$473.11 million in the corresponding period of the last year, reflecting the increased demand for food products during the month of Ramadan which has evidently contributed to the increase of food imports. Cars and spare parts showed a rise of 57 percent; to US\$164.39 million, up from US\$104.60 million in the same quarter last year. In this quarter it is witnessed a remarkable increase of more than twofold in the import of medical products, from US\$150.67 million in the first quarter of 2023 to US\$311.47 million in the current quarter. This significant growth can be attributed to the introduction of high quality and improved medical equipment, revolutionizing the healthcare sector. Moreover, there has been a substantial growth in the imports of clothes and footwear (US\$260.80 million), with figures showing an increase of more than twofold. This surge is largely influenced by the festive season, particularly Eid al-Fitr, which traditionally sees a surge in demand for clothes and footwear as part of the celebrations.

Imports of oil & gas showed an increase of 39 percent; to US\$195.02 million this quarter, up from

US\$140.55 million in the corresponding period of 2023. Electronics and electric machines recorded a growth of 22 percent, to US\$57.71 million against US\$47.34 million in 2023Q1 last year.

Personal care products have experienced a remarkable increase of 93 percent, reaching US\$73.96 million, up from US\$38.29 million in the corresponding period last year. Additionally, the plant industry has shown growth of more than twofold, surging from US\$22.19 million in 2023Q1 to US\$53.54 million this quarter. Imports of furniture and utensils have also seen an increase of 39 percent, to US\$54.23 million this quarter from US\$38.30 million in the same period last year. Moreover, the beverage and tobacco imports recorded a growth of 37 percent, totalling US\$32.51 million compared to US\$23.75 million in the corresponding period of the previous year. However, it is worth noting that the values of imported cosmetics and construction materials have declined by 30 percent and 38 percent, respectively compared to the corresponding period of 2023Q1 last year. Construction materials specifically dropped to US\$212.33 million in this quarter from US\$340.69 million in 2023Q1.

Table 5: Comparison Between Imports of 2023Q1 & 2024Q1 (In Millions of US Dollars)

3.3 Domestic Exports of the First Quarter of 2024

In the first quarter of 2024, the total value of exports expanded by 29 percent, representing a total value of US\$340.96 million compared to US\$265.07 million in 2023Q1. This growth can be attributed to the favourable rainfall experienced over the last two seasons. The improved weather conditions have had a positive impact on agricultural output, leading to increased exports and improved livelihoods.

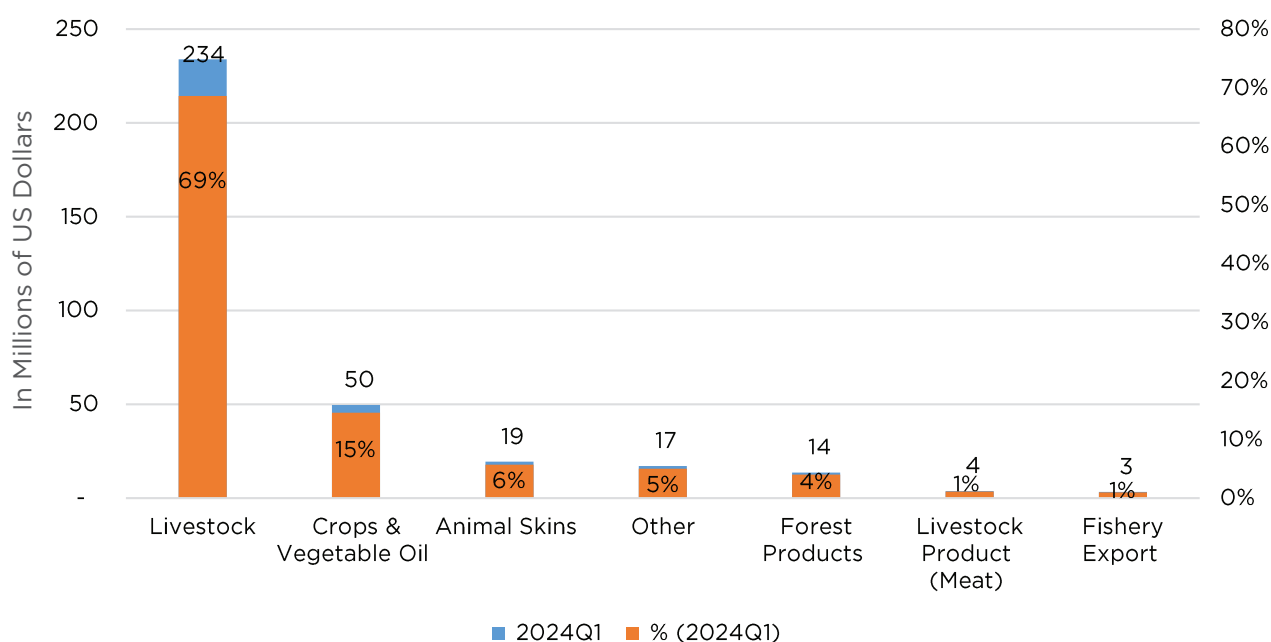

Livestock exports remain the top export category in this quarter, totalling US\$233.93 million, and representing 69 percent of total exports. Following livestock exports, crops and vegetable oil accounted for 15 percent, while animal skins and forest products held shares of 6 percent and 4 percent, respectively, in the total export value. Livestock products and fishery exports, on the other hand, contributed only 1 percent each to the overall exports this quarter. The percentage share of each sector in this quarter is illustrated in the following table.

Table 6: Percentage Shares of the Leading Export Items in the First Quarter, 2024

Category	2023Q1	2023Q2	2023Q3	2023Q4	2024Q1	% (2024Q1)

Figure 11: Leading Export Items in the First Quarter 2024

Source: MoF with CBS valuations and adjustments, 2024

As table 7 exhibits, the value of exported livestock increased by only 3 percent; to US\$233.93 million in 2024Q1 compared to US\$226.35 million in the same period of 2023Q1. On the other hand, crops and vegetable oil witnessed a remarkable surge, reaching US\$49.66 million, from US\$14.36 million recorded in 2023Q1. Moreover, animal skins exhibited a notable increase, amounting to US\$19.47 million, up from

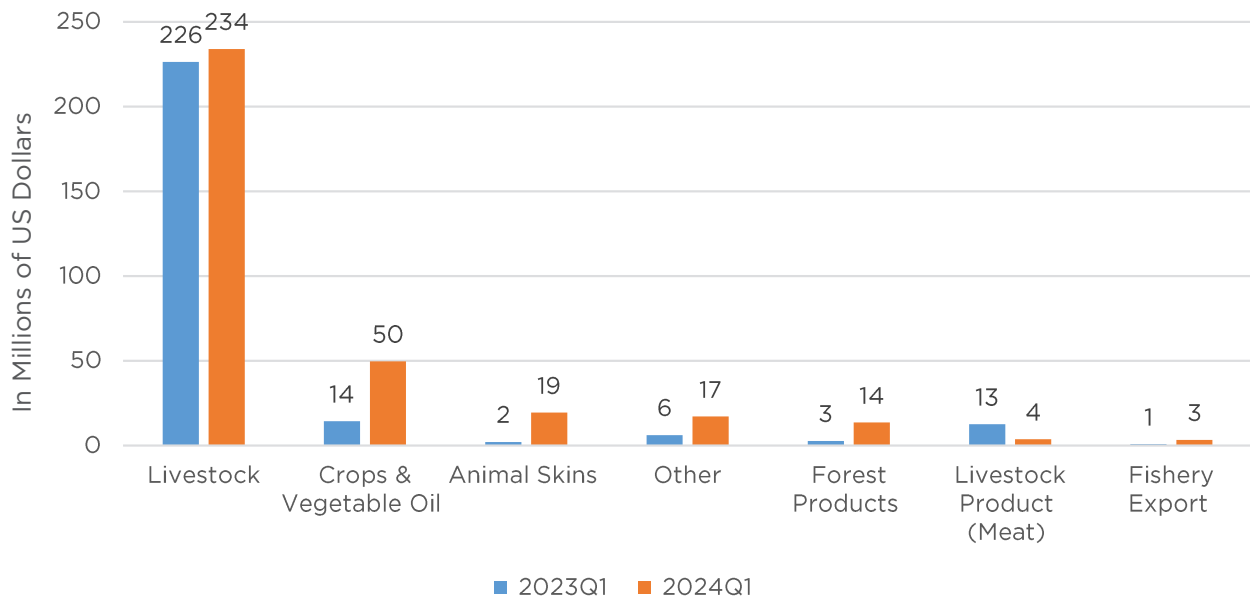

US\$2.10 million in 2023Q1. The fishery exports have made a significant increase from US\$0.78 million in 2024Q1 to US\$3.34 million in the current quarter. Similarly, forest products showed a substantial increase, totalling US\$13.64 million compared to US\$2.69 million in 2023Q1. However, livestock products made a significant decline of 70 percent from US\$12.61 million to US\$3.78 million in 2024Q1.

Public Finance Development

The budget of the Federal Government of Somalia for the year 2024 was jointly approved by the two houses of the parliament on December 9, 2023. The approved budget for 2024 is estimated to be US\$1,040.8 million, marking a 13 percent increase from the previous year's revised budget of US\$917.3 million. This rise signals the government's commitment to enhancing government fiscal operations and increase service delivery.

Donor grants are expected to cover 67 percent of the programmed budget, which amounts to US\$694.6

million for both multilateral and bilateral grants. The remaining US\$346.2 million (33 percent of the budget) is expected to be generated from domestic revenues. The main sources of domestic revenue include Taxes on International Trade, Administrative Fees, Taxes on Goods and Services, Tax on Income, Profits, and Capital Gains as well as Non-tax Revenue.

On the expenditure side, the FGS is projected to have an estimated expenditure of US\$1,079.3 million in 2024, with an anticipated financing gap of US\$38.5 million. Approximately 94 percent (US\$1,016.2 million) of the FGS's spending is projected to be used for recurrent expenses, while the remaining 6 percent (US\$63.1 million) are allocated for capital expenditure. Despite revenue and grants are projected to rise by 13 percent from US\$917.3 million in 2023 to US\$1,040.8 million in 2024, the fiscal spending is projected to expand by 17 percent to US\$1,079.3 million, as a result, a financing gap of US\$38.5 million is projected.

4.1 FGS Revenue and Grants

In the first three months of the fiscal year of 2024, the FGS fiscal receipts reached US\$118.4 million, which is equivalent to 11.4 percent of the target budget. Within this amount, domestic revenues accounted for US\$91.7 million, while external grants amounted to US\$26.7 million, representing 77 percent and 23 percent of the total fiscal receipts for the reporting period, respectively.

The FGS fiscal strategy continues to prioritize domestic revenue mobilization, as domestic revenues are expected to increase to US\$346.2 million, an amount that is expected to nearly cover the compensation costs of employees. During the first quarter of 2024, domestic revenues amounted to US\$91.7 million, a significant increase of 41 percent

compared to the domestic fiscal receipts of the first quarter of 2023. Tax revenue collections amounted to US\$65.8 million, accounting for 72 percent of domestic revenue, while the collected non-tax revenues amounted to US\$25.9 million, representing 28 percent of the domestic revenue.

During the quarter under review, donor grants experienced a marked increase, although its lower-than-expected budget target, donor grants increased by 66 percent to US\$26.7 million, up from US\$16 million of the donor grants received during the same period last year. Multilateral grants recorded US\$21.1 million, making up 79 percent of total grants, while bilateral grants accounted for US\$5.6 million, representing 21 percent of the total grants received.

Figure 14: The Performance of Government Fiscal Receipts in the First Quarter of the Fiscal Year 2024

Source: MoF, 2024

4.2 FGS Expenditure Performance

As of March 2024, the total government expenditure reached US\$126.4 million, which represented 12 percent of the planned budget. Within this amount, approximately 99 percent of the FGS’s expenditure, totalling US\$125.2 million, was allocated to recurrent expenditures, while the remaining amount of US\$1.2 million spent on capital expenditure, equivalent to 1 percent of total spending. Overall, FGS’s fiscal operation resulted in a financing gap of US\$8 million.

During the quarter under review, recurrent expenditure amounted to US\$125.2 million, representing 99 percent of the total expenditure and 12 percent of the target budget. This marks a 24 percent increase compared to recurrent expenditures in the same period last year. Major recurrent expenditure categories for this quarter included compensation of employees at US\$80.6 million, which accounts for 64 percent of total expenditure. Government use of goods and services amounted to US\$28.1 million, representing 22 percent of recurrent expenditure. FGS budget support

to Federal Member States (FMS) accounted for 11 percent, amounting to US\$13.9 million, while subsidies totalled US\$1.7 million, accounting for only 1 percent of the recurrent expenditure in the first quarter of 2024.

On the capital expenditure side, the FGS is projected to have an estimated capital expenditure of US\$63.1 million in 2024, representing 6 percent of the programmed budget. During the first quarter of 2024, the FGS spent US\$1.2 million on capital expenditure, equivalent to only 2 percent of the spending target.

Figure 15: The Performance of Government Fiscal Spending in the First Quarter of 2024

Source: MoF, 2024

4.3 Comparison of Quarterly Fiscal Performance

The total revenue and grants for the first quarter of 2024 showed exceptional performance compared to the corresponding quarter of the previous year. In 2024Q1, the total FGS receipts amounted to US\$118.4 million, up from US\$81 million in the same period last year, representing a 46 percent increase equivalent to US\$37.4 million. Domestic fiscal receipts in 2024 surpassed the 2023Q1 figures by 41 percent, reaching US\$91.7 million compared to US\$64.9 million received in 2023Q1.

In the first quarter of 2024, tax revenue reached US\$65.8 million, while non-tax revenue totalled US\$25.9 million. These figures represent a 45 percent and 33 percent increase, respectively, compared to

the corresponding period last year. The performance in domestic revenue during the first quarter of 2024 signals effective tax administration within a backdrop of favourable economic conditions, and the implementation of multiple tax policy reforms and administrative strategies aimed at enhancing tax compliance and collection efficiency.

The total external grants showed a performance of 66 percent relative to the amount received in the same period last year, amounting to US\$26.7 million, up from US\$16.1 million in 2023Q1. Bilateral grants amounted to US\$5.6 million while multilateral grants amounted to US\$21.1 million in 2024Q1.

Table 9: Comparison of Quarterly Fiscal Performance (2020Q1 - 2024Q1)

	2020Q1	2021Q1	2022Q1	2023Q1	2024Q1

Source: MoF, 2024

In the first quarter of 2024, the total expenditure of the FGS reached US\$126.4 million, which was 24 percent higher than the expenditure in the same period last year. The recurrent expenditure in the first quarter of 2024 amounted to US\$125.2 million, showing a 24 percent increase from US\$101.1 million in 2023Q1.

Employee compensation showed an increase of 25 percent from the same period in 2023, totalling US\$80.6 million, while government use of goods and services increased by 43 percent reaching US\$28.1 million. The FGS transfers to FMS amounted to US\$13.9 million in 2024Q1 up from US\$12.2 million in 2023Q1. Capital expenditure in 2024Q1 increased by 20 percent, from US\$1 million in 2023Q1 to US\$1.2 million in 2024Q1.

4.4 Federal Member States Revenue and Grants

Puntland State generated the highest fiscal receipt of all the Federal Member States (FMS) in the first quarter of 2024. During the reporting period, Puntland State of Somalia received US\$26.7 million in domestic revenue and grants in the first quarter of 2024, marking a 7 percent increase compared to the same period of the previous year. Followed by

Jubaland State of Somalia with a total fiscal receipt of US\$10.1 million in revenue and grants, marking a significant increase of 20 percent compared to the corresponding period of the previous year. During the quarter under review, Galmudug State of Somalia generated US\$4.7 million, showing a 35 percent increase over the same period last year. Southwest and Hirshabelle States received US\$3.3 million and US\$2.1 million in domestic revenue and grants in the first quarter of 2024, respectively.

4.5 Federal Member States Expenditure

During the quarter under review, Puntland state of Somalia spent a total of US\$24.3 million, with a financing surplus of US\$2.4 million. In contrast, Jubaland State of Somalia spent US\$11.5 million, resulting in a financing gap of US\$1.4 million. Similarly, Galmudug State faced a financing gap of US\$0.5 million after spending US\$5.2. Moreover, Southwest State and Hirshabelle State spent US\$3.4 million and US\$3.0 million, respectively, resulting in a financing gap of US\$0.1 million and US\$0.9 million, respectively.

Financial Sector Development

The Central Bank of Somalia (CBS) plays a proactive role in promoting the development of the financial sector. It collaborates with government agencies, financial institutions, and international partners to enhance financial infrastructure, foster innovation, and promote financial inclusion. In the dynamic landscape of Somalia's financial sector, the first quarter of 2024 witnessed remarkable strides towards bolstering stability and fostering growth. Efforts abounded to enrich financial infrastructure and nurture economic resilience, reflecting the nation's unwavering dedication to progress and prosperity.

One key aspect of Somalia's financial sector development was the continued expansion of mobile banking and digital financial services. With the increasing penetration of mobile phones across the country, mobile money platforms played a crucial role in improving access to financial services, especially in rural areas. This trend not only facilitated transactions but also promoted financial inclusion among underserved populations.

Moreover, efforts were made to strengthen regulatory frameworks and supervision to ensure the stability and integrity of the financial system. CBS continued its efforts to enhance regulatory oversight and risk management practices among financial institutions. Measures were also taken to combat money laundering and terrorist financing, in line with international standards.

In parallel, initiatives were launched to promote entrepreneurship and small business development. Access to credit remained a priority, with the government and international partners providing support for microfinance programs and initiatives aimed

at empowering small and medium-sized enterprises (SMEs). These efforts aimed to stimulate economic growth, create employment opportunities, and reduce poverty levels.

Additionally, CBS recently joined the Alliance for Financial Inclusion (AFI) which signifies a momentous step towards enhancing financial sector development in the country. By joining AFI, Somalia gains access to a vast network of knowledge-sharing platforms, technical expertise, and policy resources. This collaboration facilitates the implementation of innovative financial inclusion strategies tailored to Somalia's unique economic landscape.

In essence, Somalia's financial sector is on an upward trajectory, buoyed by a combination of local innovation and international support. With each step forward, the country inches closer to realizing its full economic potential and improving the livelihoods of its citizens. This can be seen by the increasing level of assets of the banking industry as it reaches a new high of US\$1,813.7 million in the first quarter of 2024.

5.1 Banks

The prosperity and sustained expansion of Somalia's economy are significantly reliant on the resilience of its growing banking industry, which serves as a cornerstone for the stability and advancement of the nation's financial framework. The effective operation of Somalia's commercial banks and their compliance with regulatory standards have played a crucial role in safeguarding the solidity and expansion of the country's financial infrastructure.

In the first quarter of 2024, total assets surged to US\$1,813.7 million, marking a notable 22 percent increase compared to the same period last year and a 1 percent increase compared to the last quarter of 2023. This upward trajectory in the expansion of commercial banks' assets suggests a promising future for Somalia's banking sector.

The primary drivers behind the growth in total assets include financing assets, investment assets and cash on hand. Financing assets reached US\$392.1 million in the first quarter of 2024, representing a 25 percent increase compared to 2023Q1 and a 3 percent decrease against 2023Q4.

Investment assets, including equities, properties, and real estate, also experienced a growth of 41 percent compared to the US\$239.0 million recorded in 2023Q1 and 11 percent increase over the amount recorded in 2023Q4. Notably, trade financing continues to be the primary account of the financing assets accounting for 32 percent of total financing assets in 2024Q1, witnessing a remarkable 40 percent increase compared to 2023Q1, to signal enhanced trust and confidence in Somalia's banking system.

Figure 21: Consolidated Balance Sheet for Commercial Banks (Assets) (2022Q1 - 2024Q1)

Source: CBS, 2024

In the first quarter of 2024, total liabilities surged to US\$1,520 million, marking a 20 percent increase compared to the same period last year. Customer deposits remained the primary liabilities of commercial banks, accounting for 96 percent of the total liabilities, totalling US\$1,463 million, reflecting a 25 percent

increase compared to 2023Q1. This increase was primarily fuelled by demand deposits from individuals, constituting 53 percent of customer deposits, and witnessing a 24 percent increase compared to the same period of the previous year, reaching US\$780.7 million in the first quarter of 2024.

5.2 Remittances

Remittances are a crucial element in Somalia’s financial sector development, serving as a major source of income for many households and contributing to poverty alleviation and improved living standards. They have driven the growth of financial institutions, particularly Money Transfer Businesses (MTBs) and Mobile Money Operators (MMOs, facilitating greater financial inclusion. These financial inflows support investments in businesses and entrepreneurial ventures, stimulating local economic activity and job creation.

Moreover, remittances provide a stable source of foreign exchange, essential for Somalia’s macroeconomic stability. The engagement of the Somali diaspora through remittances also funds community projects and infrastructure development, reinforcing economic resilience.

In the first quarter of 2024, total inward remittances to Somalia almost reached US\$1,500.0 million. This marks an increase of 4 percent compared to in both 2023Q1

and 2023Q4. This marks positive recovery in remittance inflows, against the moderate growth evidenced since onset of the war in Ukraine and as a result of tightening global monetary conditions and supply disruptions. The recovery of the inward transfers is contributed to easing monetary and enhanced global output.

Additionally, the most remarkable aspect of this recovery is the substantial rise in business transfers. These have surged by 90 percent compared to all previous quarters, hitting an unprecedented US\$551 million. This significant increase highlights global economic recovery coupled with potential investment opportunities in the country

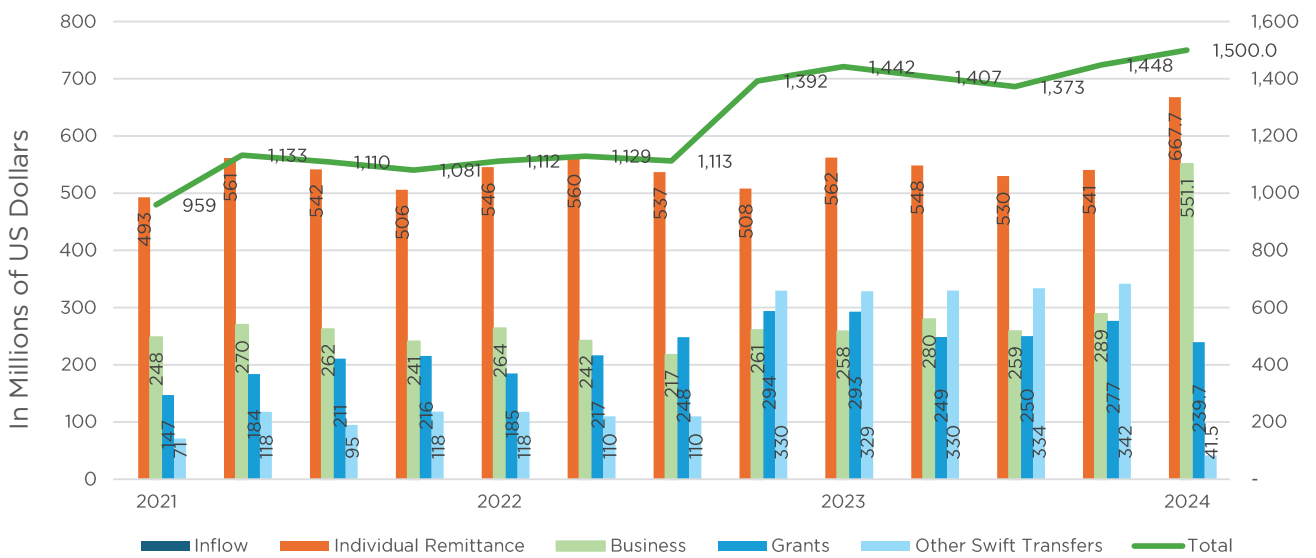

Remittances to individuals increased to US\$667.7 million in 2024Q1, up from US\$562.3 million in 2023Q1, this is 19 percent higher over 2023Q1. NGO transfers decreased by 18 percent in 2024Q1 over the same period last year, reaching US\$239.7 million, up from US\$293 million in 2023Q1.

Table 12: Remittance Inflows in Millions of US Dollars (2022Q1 - 2024Q1)

5.3 National Payment System

In the first quarter of 2024, Somalia’s National Payment System (NPS) recorded 297,036 transactions totalling US\$393 million. Compared to the fourth quarter of 2023, the value and volume of these transactions fell by nearly 27 percent and 10 percent, respectively. However, when compared to the same period in 2023, the value of NPS transactions increased by 11 percent and the volume by 2 percent. Real Time Gross Settlement (RTGS) remained the dominant component of the NPS, accounting for 74 percent of the total transaction value in 2024Q1.
